

Helping to Shape the Future of Medicine

As one of the country's largest operator of medical groups and physician networks, DaVita HealthCare Partners® (HCP) provides comprehensive primary care, specialty care, and pharmacy services across California, Nevada, Arizona, Colorado, New Mexico, and Florida. Over 14,000 providers nationwide care for over 1.5 million members in multispecialty clinics, urgent care centers, infusion and outpatient surgery centers, and over 100 affiliate hospitals.

For 20 years, clinical trials have been conducted at HCP on behalf of pharmaceutical and biotechnology organizations, leveraging a shared passion for and commitment to clinical excellence and improving patients' health and quality of life.

As a wholly owned subsidiary of DaVita Healthcare Partners, DaVita Clinical Research uses extensive, de-identified HCP databases and real-world healthcare experience to assist pharmaceutical and medical device companies in the design, recruitment, and completion of prospective and pragmatic clinical trials, as well as retrospective observational research studies. DCR's scientific and clinical expertise spans the lifecycle of product development with more than 175 client companies over the last 30 years.

DCR delivers experienced and highly efficient clinical study execution through:

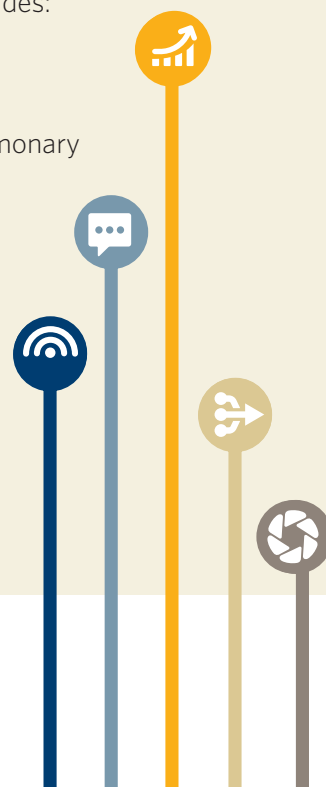

- Centralized services to help simplify your study, with a single point of contact for multisite studies to manage regulatory documents, contracting, budgets, and feasibility analysis
- Engaged clinicians serving as investigators as they provide quality care to their patients
- Provider insight and real-world de-identified data on more than a million patients to help inform study design and recruitment strategies

Together, HCP and DCR offer operational and clinical insight across a range of therapeutic areas.

- Primary Care
 - Family Practice
 - Internal Medicine
 - Pediatrics
- Specialty Care
 - Cardiology
 - Dermatology
 - Endocrinology
 - Gastroenterology
 - Immunology
 - Obstetrics/Gynecology
 - Oncology
 - Pulmonology
 - Rheumatology
 - Urology

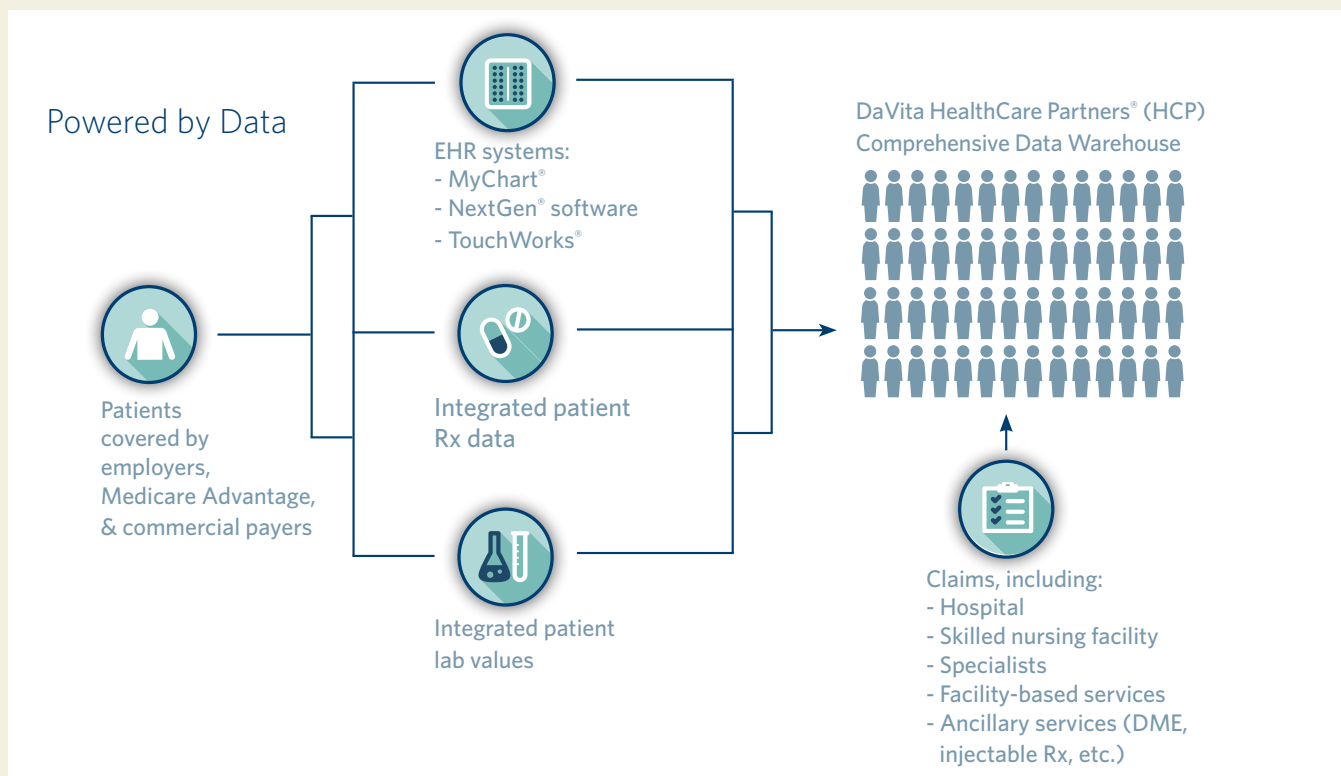

Recent trial experience includes:

- Arthritis
- Asthma
- Cardiovascular Disease
- Chronic Obstructive Pulmonary Disease (COPD)
- Constipation
- Diabetes
- Overactive bladder
- Psoriasis
- Vaccines

Why comprehensive data matters

By using a comprehensive dataset (including claims, electronic health record (EHR), pharmacy, and lab data), DaVita Clinical Research® (DCR) provides an optimally comprehensive view of virtually the entire healthcare spectrum. From understanding changing lab profiles to examining transitions of care across healthcare settings and beyond, our data provides our clinicians and our partners with unique insight into the patient journey.

Put our data to work

Unsurpassed in experience, DCR® has the ability to support you across multiple phases of drug development. We may also help you gain access to the de-identified patient data you need.

- Feasibility analysis for trials
- Sensitivity analysis for trial parameters
- Screening tools that leverage contemporary EHR data
- Investigative sites for actual trial placement
- Understanding of practice patterns
- Examinations of medication adherence and compliance
- Retrospective analysis comparing effectiveness of multiple therapies
- Economic and clinical outcome assessments that are relevant to providers and payers
- Competitive intelligence in a real-world healthcare setting
