

↳ Late Stage Clinical Trials (II-IV)

Multi-Specialty Research

DaVita Clinical Research:

Helping to Shape the Future of Medicine

As one of the country's largest operators of medical groups and physician networks, DaVita Medical Group (DMG), a wholly owned subsidiary of Davita, provides comprehensive care across six states. For over 20 years, clinical trials have been conducted at DMG (formerly HealthCare Partners) on behalf of pharmaceutical and biotechnology organizations. As a wholly owned subsidiary of DaVita, DaVita Clinical Research (DCR) uses extensive DMG databases and real-world healthcare experience to assist pharmaceutical and medical device companies in the design, recruitment, and completion of prospective and pragmatic clinical trials, as well as retrospective observational research studies.

For 20 years, clinical trials have been conducted at DMG on behalf of pharmaceutical and biotechnology organizations

- Leadership with extensive experience in **Clinical Research management**
- 14,000 providers nationwide care for over 1.5 million members in multispecialty clinics, urgent care centers, infusion and outpatient surgery centers, and over 100 affiliate hospitals

Extensive Phase 2-4 trial experience including:

- Cardiovascular studies
- Rheumatology studies
- Metabolic studies
- Woman's studies

Experience and Expertise

DCR provides experienced and highly efficient clinical study execution through:

- Centralized services to help simplify your study, with a single point of contact for multisite studies to help manage regulatory documents, contracting, budgets, and feasibility analysis
- Engaging clinicians serving as investigators as they provide quality care to their patients
- Provider insight and real-world de-identified data on more than a million patients to help inform study design and recruitment strategies.

**DCR offers
operational
and clinical
insight across
a range of
therapeutic
areas**
