

CKD & Rare Disease Network

Data Driven. Broad Access. Unmatched Expertise.

With an established and wide-reaching network, we provide efficiency, access, and patient diversity for CKD trials. Learn more about our decentralized model and find out how we can support your study.

Rare Disease Trials Have Numerous Roadblocks

-  • 85% of clinical trials experience delays
-  • Actual enrollment timelines double planned timelines
-  • 50% of sites achieve actual enrollment goals
-  • 56% of oncology patients have access to research trials

How can DCR help?

-  • Access the largest U.S. CKD/ESKD Trial Network
-  • Data & workflow under unified EPIC platforms
-  • DaVita infrastructure to support sites
-  • Decades of clinical experience & expertise
-  • Access to patient population

Could your study fit our decentralized model?

Rare or Complex Conditions: IgAN, FSGS, Cystinosis, lupus nephritis, Fabry disease, aHUS, and more

Diversity: Leveraging DCT trials effectively can help diversify the patient population and meet patients where they are

Cost: Fewer sites with no enrollments

Complexity: Complex outcomes and endpoints (+digital) and complex technologies (data collection)

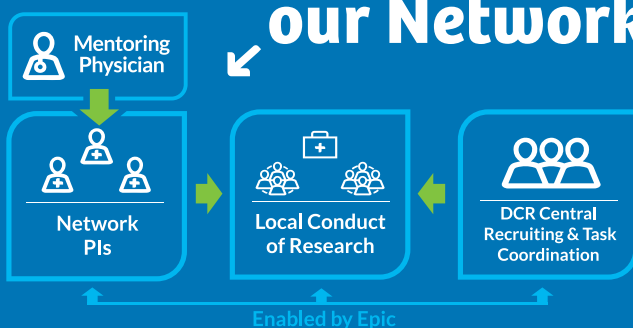

Technology: Telehealth or patient portal opportunity

We Solve: Patient Identification, Physician Identification, Study Execution

Utilize our CKD & Rare Disease Network

Insights into our Network

DCR Mentor Research Physician

- Consult on safety & clinical review
- Availability to Network PIs on given studies
- Collaborate on participant recruitment strategy
- Educate/Coach Network PIs

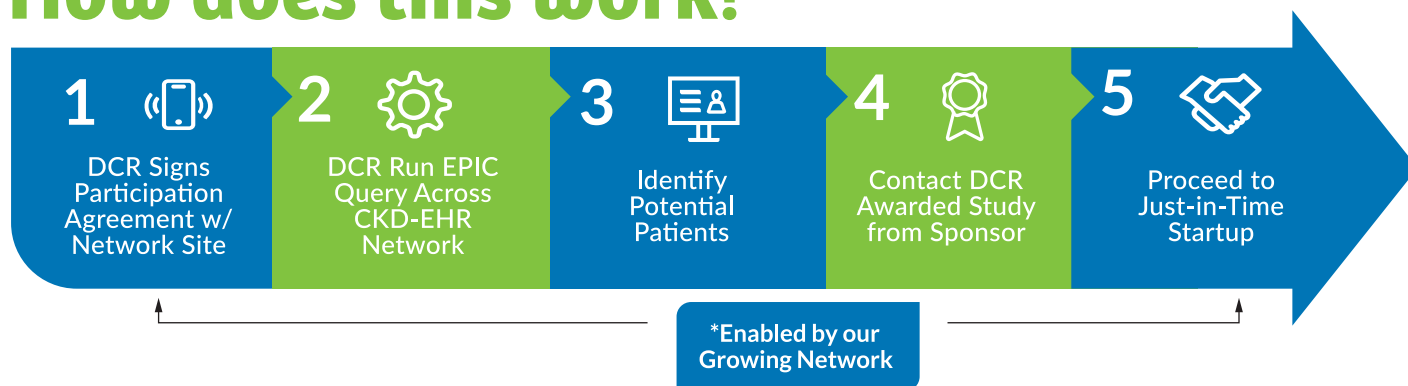

DCR Network PI:

- On Epic CKD – EHR
- Vested in expanding treatment options for CKD patients

Why use DaVita Clinical Research Decentralized Trials?

- Reduce clinical trial cycle time
- Lower trial costs by eliminating sites without patients
- Expand physician database
- Ensure faster enrollment
- Access data more quickly
- Enhance efficiency via just-in-time start-up
- Improve patient diversity
- Enhance patient retention and compliance
- Access untapped, diverse patient populations
- Benefit from technology-enabled recruitment and study conduct
- Reduce visits to central research sites

How does this work?

Let the renal experts help you.

Talk to a DaVita Clinical Research® representative today at **1-888-345-2567** to learn more about our renal expertise.
